

## High Dimensional Approximation

### Special Session in Honour of Professor Ian Sloan on the Occasion of His 85th Birthday

Professor Ian Sloan has devoted much of his research life in the area of Quasi-Monte Carlo methods for high dimensional integration and approximation problems, and their applications. He has also mentored many researchers who have become established experts in these areas. On the occasion of his 85th birthday, this session will bring together Ian's children (current and former PhD students) and adopted children (current and former postdocs) to celebrate all their continuing achievements in the research community.

Happy Birthday Ian!
